

Vikash Kumar

Full Stack AI Engineer | +91 92050 89152 | vktofly@gmail.com
linkedin.com/in/vktofly | github.com/vktofly

SUMMARY

Experienced in architecting and shipping end-to-end AI applications and full-stack SaaS platforms. Specialized in building advanced LLM-powered features, local vector search, and scalable backend automation using Python, Next.js, and Docker. Leverages a strong mathematical foundation in Deep Learning, NLP, and Convex Optimization to design efficient, secure, and highly responsive user experiences. Proven track record of optimizing operational workflows, accelerating talent acquisition, and delivering resilient infrastructure for enterprise clients.

SKILLS

- **Languages & Frameworks:** Python (Async/FastAPI), Next.js, React Native, React, SQL
- **AI & Agentic Systems:** RAG, Agentic Workflows (LangGraph, CrewAI), LangChain, Model Context Protocol (MCP), LLMs, Prompt Engineering, Transformers.js
- **Model Serving & Observability:** Ollama, vLLM, MLflow, LangSmith, DeepEval
- **Cloud & Infrastructure:** Docker, CI/CD, Cloud Platforms (AWS/GCP), Supabase, Vector Databases (Pgvector, Qdrant)
- **Architecture & Leadership:** Systems Design, Agile/Kanban, Technical Project Management, API Design

EXPERIENCE

Founder & Principal Engineer

Mar 2025 – Present

Mono Pvt. Ltd. | Noida, UP, India

- Architected self-hosted agentic workflows (LangChain, n8n, Python, Supabase) and managed client projects via Kanban, ensuring on-time delivery of custom LLM solutions, reducing manual processing time by 40%.

AI Software Engineer

Mar 2024 – Jan 2025

Techype Pvt. Ltd. | Noida, UP, India

- Built a talent acquisition platform via AI-assisted development (Cursor, Claude), streamlining candidate sourcing to reduce time-to-hire by 40%.
- Engineered full-stack features from ideation to deployment using Agile methodologies, collaborating cross-functionally to align technical deliverables with business goals.

IT Manager

Jul 2024 – Jan 2025

Aparc Healthcare | New Delhi, India

- Directed IT infrastructure across a multi-department facility, ensuring 99%+ uptime while providing technical leadership and bridging technology gaps.
- Optimized patient data management and scheduling workflows using internal tools, improving daily operational efficiency.

PROJECTS

Natural-Language-to-Chart Analytics Dashboard | [Next.js](#), [Python](#), [Supabase](#)

- Built a SaaS app converting natural language into secure, read-only SQL queries against Supabase with 30% accuracy.
- Engineered interactive React/Recharts visualizations, connecting LLMs to actionable analytics.

Real-Time "Reasoning" UI (Next.js + SSE) | [Next.js](#), [SSE](#), [Claude API](#)

- Engineered a chat UI using Next.js Server-Sent Events to stream an AI agent's internal "thoughts" token-by-token.
- Delivered a low-latency experience with real-time markdown rendering akin to ChatGPT's reasoning mode.

EDUCATION

B.Tech in Computer Science and Engineering (CSE)

Aug 2016 – Jul 2020

GB Pant Govt. Engineering College (GGSIPU)

CERTIFICATIONS & COURSEWORK

- **Relevant Coursework:** Advanced Coursework in AI/ML | MIT OpenCourseWare & IIT (Self-Paced) | 2020 – 2023
- **Certifications:** Master of Artificial Intelligence (UPenn) via Coursera, Docker Containerization, AI-Assisted Development, Data Analysis Using PySpark, Google Data Analytics Professional Certificate
