SUMMARY

AI Product Manager with proven expertise driving 0-to-1 product strategy, LLM application roadmaps, and enterprise GTM execution. Specialized in translating frontier AI capabilities into defensible B2B products, managing cost-per-query and latency trade-offs via dynamic model routing, and scaling developer adoption through metrics-driven discovery and rapid experimentation.

SKILLS

- Core Competencies:** Product Strategy & Roadmapping, Go-to-Market (GTM) Strategy, Product Discovery, Backlog Management, PRD, MVP, Stakeholder Management, Product-Market Fit (PMF), RICE Prioritization, Dynamic Model Routing, Token Economics, Customer Advisory Boards (CAB)
- Methodologies:** Agile / Scrum, Kanban, Lean Methodology, Eval-Driven Development
- Data & Analytics:** A/B Testing, OKRs, KPIs, LLM Evals (Ragas, Context Precision, Faithfulness), F1-Score, TTFT, TPS, SQL, Amplitude, Mixpanel, Human-in-the-Loop (HITL) Telemetry
- Tools:** Jira, Confluence, Productboard, Figma, Aha!, Postman, Git / GitHub
- AI/ML Technologies:** Large Language Models (LLM), Retrieval-Augmented Generation (RAG), Agentic Workflows, Model Context Protocol (MCP), Prompt Engineering, Semantic Caching, Vector Databases, NeMo Guardrails, Prompt Injection Defense, Hallucination Mitigation, Red Teaming, PII & Enterprise Governance
- Engineering & DevOps:** MLOps, CI/CD, Python, Docker, GCP, LangChain, LlamaIndex, OpenAI/Anthropic APIs

EXPERIENCE

Lead Product Manager Mar 2025 – Present
Mono Pvt. Ltd. | Noida, UP, India

- Directed 0-to-1 product strategy and GTM execution for an enterprise B2B SaaS AI workflow platform, capturing 15 B2B enterprise clients and generating initial Annual Recurring Revenue (ARR) by defining the MVP scope through 40+ structured customer discovery interviews.
- Architected dynamic model routing across frontier and lightweight SLMs, decreasing blended cost-per-query by 42% while converting 80% of enterprise POCs to paid annual contracts.
- Managed end-to-end product lifecycle, leading cross-functional engineering and design teams to deploy Model Context Protocol (MCP) integrations and iterating on core features based on quantitative usage metrics and user feedback.

Technical Product Manager Mar 2024 – Jan 2025
Techype Pvt. Ltd. | Noida, UP, India

- Accelerated enterprise time-to-hire by 40% by launching an LLM-powered candidate matching feature with Human-in-the-Loop (HITL) telemetry that improved matching precision from 68% to 91%, backed by detailed PRDs and leading Agile/Scrum ceremonies.
- Defined and tracked key performance indicators (KPIs) and evaluation benchmarks for sourcing workflows, ensuring technical deliverables directly aligned with strategic business goals.

IT Manager & Operations Jul 2023 – Feb 2024
Aparc Healthcare | New Delhi, India

- Optimized internal clinical workflows by ruthlessly prioritizing a cross-departmental product backlog, balancing critical technical debt resolution with feature delivery to achieve a 99.9% system uptime and a 25% reduction in manual data entry time.

PROJECTS

Self-Optimizing Agent Pipeline (DSPy + LangGraph) | *DSPy, LangGraph, Python*

- Established product reliability and evaluation gates for multi-agent pipelines, improving response accuracy by 35% and reducing hallucination rates via strict latency budgets to drive a 25% increase in user feature adoption.

Embedding Data Drift Monitor | *Qdrant, Prefect, Python*

- Led product definition for an automated vector embedding telemetry system, reducing incident triage time by 40% and safeguarding platform SLA reliability against silent model degradation.

High-Throughput Local Inference Engine | *FastAPI, Prometheus, LLMs*

- Defined latency and cost-efficiency benchmarks for enterprise LLM workloads, optimizing continuous batching to cut Time to First Token (TTFT) by 150ms and reduce cloud inference operational expenditure by 30%.

EDUCATION

B.Tech in Computer Science and Engineering (CSE) Aug 2016 – Jul 2020
GB Pant Govt. Engineering College (GGSIPU)

CERTIFICATIONS & COURSEWORK

- Relevant Coursework:** Advanced Coursework in AI/ML | MIT OpenCourseWare & IIT (Self-Paced) | 2020 – 2023
- Certifications:** Master of Artificial Intelligence (UPenn) via Coursera, Docker Containerization, AI-Assisted Development, Data Analysis Using PySpark, Google Data Analytics Professional Certificate
