SUMMARY

Experienced in architecting and shipping end-to-end AI applications and full-stack SaaS platforms. Specialized in building advanced LLM-powered features, local vector search, and scalable backend automation using Python, Next.js, and Docker. Leverages a strong mathematical foundation in Deep Learning, NLP, and Convex Optimization to design efficient, secure, and highly responsive user experiences. Proven track record of optimizing operational workflows, accelerating talent acquisition, and delivering resilient infrastructure for enterprise clients.

SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python (Async/FastAPI), Node.js, Next.js, React, React Native, SQL

AI & Agentic Systems: RAG Pipelines, Agentic Workflows (LangGraph, CrewAI), LangChain, MCP, Prompt Engineering, OpenAI/Claude APIs

Model Serving & Observability: Ollama, vLLM, MLflow, LangSmith, DeepEval

Cloud & Databases: GCP (Google Cloud), Docker, CI/CD, PostgreSQL, Supabase, Vector DBs (Pgvector, Qdrant, Pinecone)

Architecture & Leadership: Microservices, Systems Design, API Design, Agile/Kanban, Cost & Token Optimization

EXPERIENCE

Mar 2025 – Present

Remote

Founder & Principal Engineer | *Mono Pvt. Ltd.*

- Architected self-hosted agentic workflows (LangChain, n8n, Python, Supabase) and managed client projects via Kanban, ensuring on-time delivery of custom LLM solutions, reducing manual processing time by 34%.

Mar 2024 – Jan 2025

Noida, India

AI Software Engineer | *Techype Pvt. Ltd.*

- Built a talent acquisition platform via AI-assisted development (Cursor, Claude), streamlining candidate sourcing to reduce time-to-hire by 40%.
- Engineered full-stack features from ideation to deployment using Agile methodologies, collaborating cross-functionally to align technical deliverables with business goals.

Jul 2024 – Jan 2025

New Delhi, India

IT Manager & Operations | *Aparc Healthcare*

- Directed IT infrastructure across a multi-department facility, ensuring 99%+ uptime while providing technical leadership and bridging technology gaps.
- Automated and optimized patient data management and scheduling workflows using internal tools, improving daily operational efficiency by [X]%.

PROJECTS

Natural-Language-to-Chart Analytics Dashboard [GitHub]

Next.js, Python, Supabase, OpenAI API

- Architected a SaaS app converting natural language into secure, read-only SQL queries against Supabase, achieving [X]% query accuracy.
- Engineered interactive React/Recharts visualizations, connecting LLMs to actionable analytics and saving users [X]+ hours of manual data extraction.

Real-Time "Reasoning" UI (Next.js + SSE) [GitHub]

Next.js, SSE, Claude API, Tailwind CSS

- Engineered a chat UI using Next.js Server-Sent Events to stream an AI agent's internal "thoughts" token-by-token.
- Delivered a low-latency experience with real-time markdown rendering akin to ChatGPT's reasoning mode, handling [X]+ concurrent streaming connections.

EDUCATION

- 2020 – 2023 • **M.Tech in AI/ML (online, self paced)** | *IIT & MIT OpenCourseWare*
- 2016 – 2020 • **B.Tech in Computer Science and Engineering** | *GB Pant Govt. Engineering College (GGSIPU) – 74%*
- 2012 – 2015 • **12th & 10th (74%)** | *CBSE Board – Advanced Mathematics and Sciences (PCM)*

CERTIFICATIONS & ADDITIONAL INFO

Certifications: Master of AI (UPenn), Transformer Models & BERT (Google Cloud), Math for ML (Coursera), Y Combinator Startup Course

Languages: English (Fluent), Hindi (Native)
